Solutions for Safe Working at Height

Why safe Working at Height is so important

According to the HSE in 2004/2005 the economic and human cost of falling from vehicles was estimated at a staggering £36 million.

Operators are under increasing pressure to enforce the new Working at Height regulations and our equipment will help you on your way to achieving full compliance.

Increased productivity

Increased availability of safety equipment improves the efficiency and productivity of an operation as employees feel more valued and able to work efficiently and confidently on the deck of a vehicle.

What not to do...

What to do...

We offer a range of working at height and fall restraint systems at Bevan Group to help operators eliminate the risks of falling from vehicles. All of our equipment has been designed with the user and their safety in mind.

Training packages are also available including detailed onsite programmes for our new KeepNet restriction of movement system and our SkyHook fall restraint system.

Bevan SkyHook System

The SkyHook system is an innovative health and safety solution for working at height.

This new fall restraint system provides ultimate safety for your personnel whilst allowing the freedom to operate along the vehicle deck.

Features include:

- **Adjustable safety harness with inertia reel**
- **Comes complete with practical and durable safety kit bag, suitable for storing additional equipment such as hard hats, gloves and goggles**

Training programmes

- **In-house tailored training programmes are available**
- **Ensures optimum safety of personnel through correct use of equipment**
- **Includes template safety records**

Fitting

Straight fit to curtainsiders, retro fit to dropsides and flatbeds. Fitted on site anywhere in the UK. For free survey and quote please call 08700 43 37 43.

Bevan KeepNet System

Essential for Restriction of Movement

The Bevan KeepNet system can be fitted to any size or length of vehicle, with nets and posts available in a variety of dimensions to suit your particular requirements. It has been designed to help operators introduce safety measures for their workforce and to protect them against the rising human and economic costs of falling from vehicles. It can also help prevent deliveries being turned away, improving the access and acceptability of vehicles to Health & Safety sensitive sites.

Key features:

- **Durable fabric mesh nets**
- **Galvanised D-ringed lashing points fitted direct to bulk head**
- **Stainless steel grab handles**
- **Galvanised removable posts, minimum 1m in height**
- **Stanchion posts fitted into receptive floor sockets**

Fitting

Retro fit to retractable canopy vehicles, flat beds and dropsides. Fitted on site anywhere in the UK. For free survey and quote please call 08700 43 37 43.

Optional extras:

- **Lockable galvanised storage box**
- **Safety belt and lanyard**
- **Additional webbing straps**
- **Spare nets**
- **Access steps**
